

Ranjeet Reddy Manchana

Los Angeles, CA | +1(562) 488-1918 | ranjeet.reddy14@gmail.com | linkedin.com/in/ranjeetreddy14

Professional Summary

<https://ranjeetreddy14.github.io>

Security engineer experienced in detection engineering, cloud security workflows, and automated response development across enterprise environments. Skilled in SIEM correlation, EDR operations, vulnerability assessment, and endpoint/network telemetry analysis. Hands-on with Python automation, REST API integrations, and building Agentic AI + RAG workflows for contextual threat detection. Knowledgeable in PCI DSS, SOX, GDPR, and CCPA practices, with experience aligning controls to NIST 800-53, NIST CSF, and ISO 27001. Adept at system hardening, protocol analysis, and developing scalable security playbooks and SOPs.

Education

California State University Dominguez Hills , Carson, CA Master of Science in Cybersecurity 05/2025	GPA - 3.94/4.00
Jawaharlal Nehru Technological University , Hyderabad, Telangana Bachelor of Technology in Information Technology 07/2023	GPA - 3.10/4.00

Experience

Information Security Engineering Intern, Legendary Entertainment – Burbank, CA Jan 2025 – April 2025

- Continuously monitored security events in Splunk, triaged and prioritized alerts by severity/impact, triaged Defender XDR telemetry, log analysis and documented incident timelines, evidence, and containment steps for clean handoffs.
- Built SIEM dashboards and correlation searches and detection logic mapped to MITRE ATT&CK, automatically flagging potential threats and associated TTPs, Conducted log correlation and forensic analysis of endpoint and network data.
- Participated in vulnerability assessment and patch validation, coordinating with IT for timely remediation.
- Designed a custom security framework mapped to NIST, CIS and TPN controls to audit security posture of 3rd party vendors.
- Contributed to laying foundations for Agentic AI with RAG capabilities to enhance contextual threat analysis
- Monitored for policy violations and database-related activity anomalies as part of data protection workflows.

Cyber Security Analyst (Volunteer), Community Dreams Foundation - FL, Remote Sep 2025 - Present

- Conducted log analysis for indicators of compromise across firewalls, DLP, and endpoint systems.
- Implemented best practices for access management, patch verification, and compliance with NIST CSF and CIS standards.
- Coordinated with client IT teams for secure scan deployment and performed client advisory communication.
- Mapped security controls to Confidentiality, Integrity, Availability (CIA) triad and NIST baselines..
- Analyzed Splunk and Microsoft Sentinel logs to detect anomalies, correlate IOCs, and escalate verified threats.

Projects

- **Cloud Incident Response Automation (AWS)**: Built an automated detection and response system integrating GuardDuty, EventBridge, and Lambda to automatically isolate EC2 instances, trigger SNS alerts, and reduce manual triage time by 40%.
- **Agentic AI + RAG based Threat Intelligence Agent**: Developed a browser-based private LLM using Qwen2.5, llama.cpp, and ChromaDB for real-time document retrieval, threat analysis, and reasoning, showcasing applied AI/ML + Agentic RAG workflows.

Certificates

AWS Certified Cloud Practitioner - Credential ID : 9cfed1c1386e4b34b47852e19769f2e6,	(2024 - 2027)
(ISC)² Certified in Cybersecurity - Credential ID : 2376187 (CompTIA A+ In Progress)	(2025 - 2028)

Technologies

Security Operations: Splunk ES, Sentinel, IDS/IPS, SIEM Dashboards, DLP, Defender for Endpoint, CrowdStrike
Vulnerability & Compliance: Nessus, CVE/CVSS Analysis, PCI DSS, SOX, GDPR, CCPA, NIST 800-53, ISO 27001
Network & System Security: Firewalls, DNS, DHCP, VPN, TLS, SMTP, SFTP, Windows/Linux Hardening.
Security Tools: Wireshark, pfsense, Snort, Docker, SysInternals, Nmap, Metasploit, Burp Suite, and John the Ripper.
Automation & AI: Python, PowerShell, YOLOv5, OpenCV, Agentic AI, RAG Workflows, AWS Lambda Automation
Identity & Access: Active Directory, Okta, MFA, Conditional Access, RBAC Policies
Forensics & Incident Response: Packet Capture Analysis, Log Review, Playbook Documentation, Risk Exception Tracking
Reporting & Governance: Excel Dashboards, Confluence, Jira, Power BI, Audit Evidence Tracking
